

The Fairway 37 is a big volume boat having an overall length of around 42 feet including the bow sprit and swim platform. The new Fairway 37 Sedan is designed for maximum useability and comfort. The owners are treated to a large forward stateroom with island Bed and plenty of storage space. The guest cabin has 2 large single bunks or can be fitted with a convertible double and single. In the saloon, the helm is fitted to port with a long galley running down the entire starboard side.

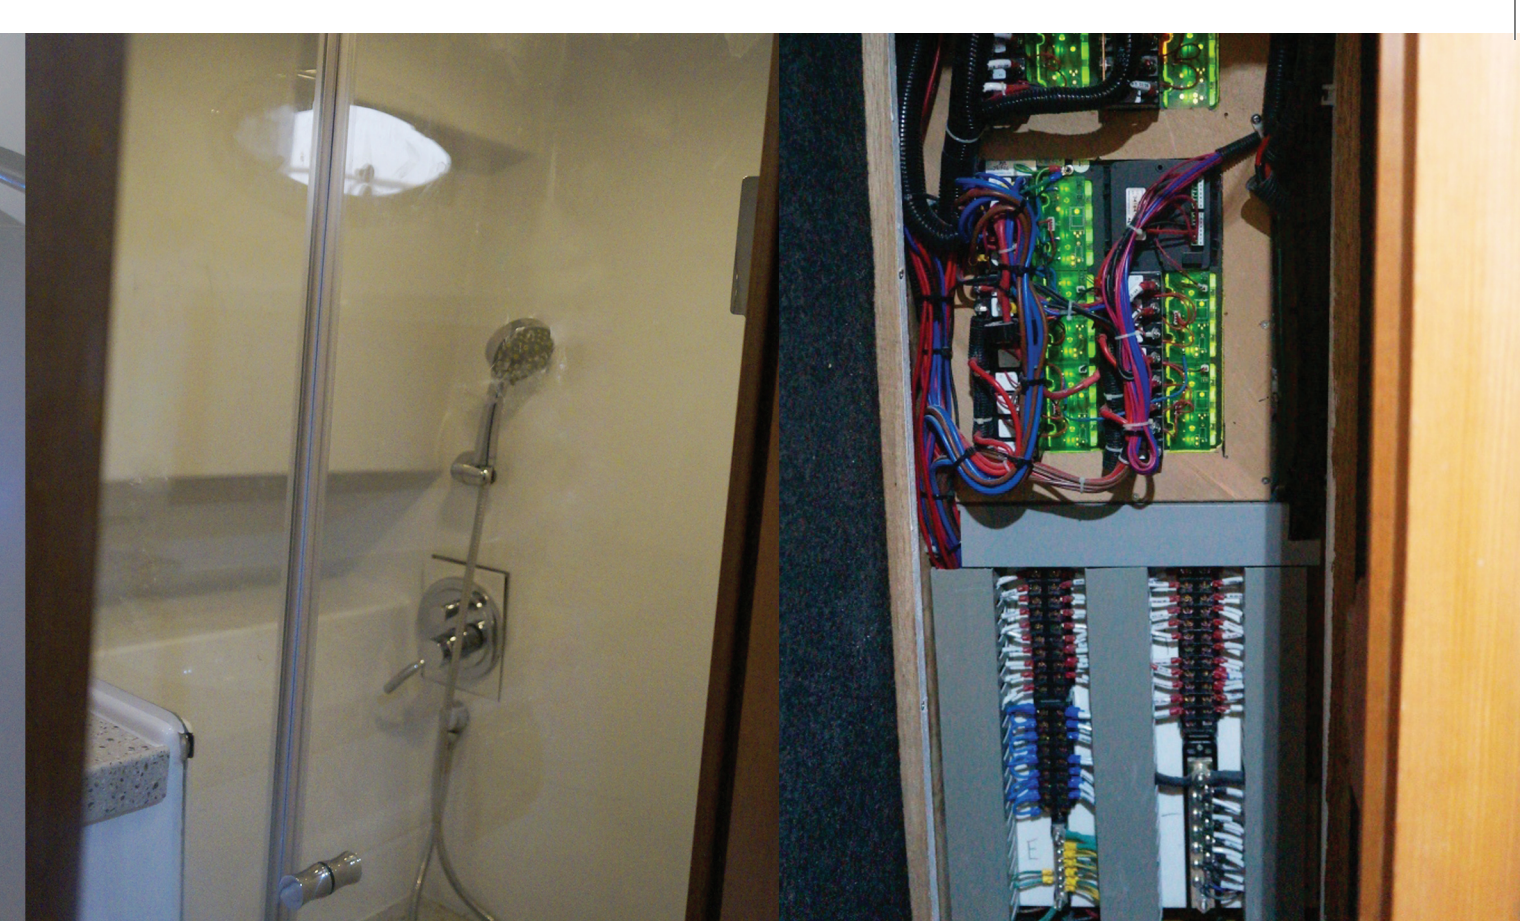

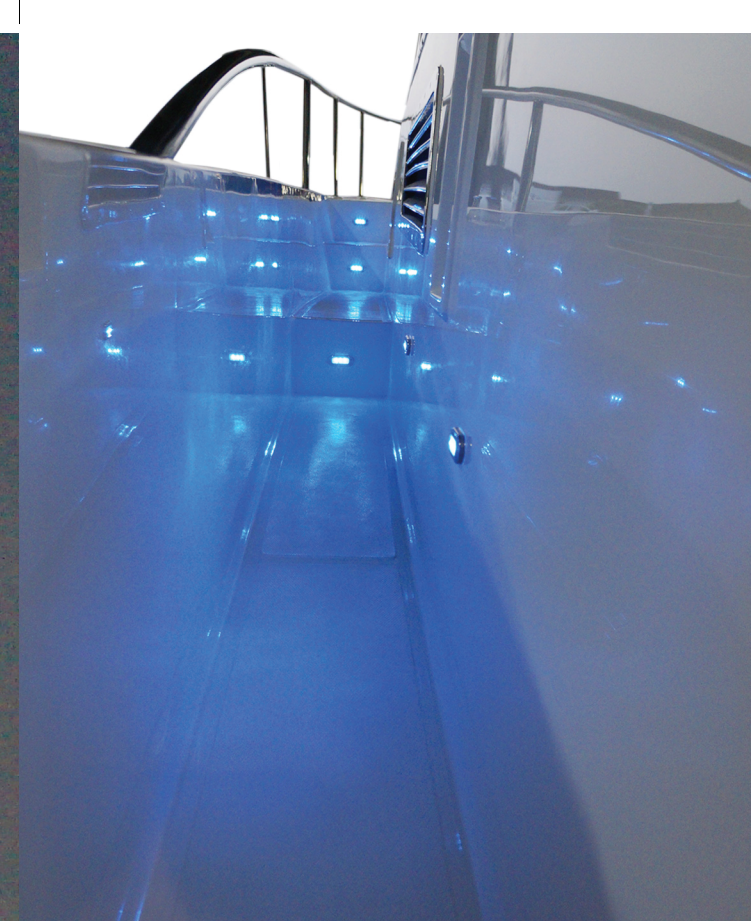

The galley is equipped with electric hotplates, fridge/freezer, microwave oven and has plenty of storage for provisions during coastal cruising. To port in the saloon is a large L shape settee with dining table. The rear cabin doors open right across the boat so that the saloon flows out to the cockpit, offering a huge living and lounging area. The cockpit has built in seating in each aft corner and removable tables for entertaining or dining outside. The Hardtop completely covers the cockpit and side covers can be fitted for all weather conditions.

LUXURY

Access to the bow is now safer and easier with added walk-around side decks through to the bow. A centre rear cockpit door opens out to an extended swim platform. There is a storage boot on either side accessed from the platform for BBQ, outboard engine, fenders, fishing gear etc. The platform has a stainless steel rear rail for tender and cockpit mount.

The New Fairway 37 Sedan is built for coastal cruising and the Fairway hull has an excellent reputation for its ability at sea along with outstanding economy. The Fairway ECO Cruise hull offers around 16 Knots with standard 240 HP engine and will cruise at up to 14 Knots. At displacement speeds of 8-9 Knots the boat will average around 1-1.2 Litres per nautical mile which gives a remarkable range of between 550 and 650 nautical miles. Even at 12 to 14 Knots, fuel usage is only around 20 to 30 Litres per hour which will give a range of between 340 and 400 nautical miles.

Included as standard are:

- Fairway Eco Cruise hull
- Walk-around side decks for safety and ease of access
- Extended hardtop over cockpit with side covers
- Wide opening rear bulkhead for the cockpit to become part of the living area
- Extended swim platform and stainless steel rear dinghy and BBQ rail
- Generator and electric cooking for safety on-board
- Air-conditioning system for those hot summer nights
- Bow and stern thrusters to make handling a breeze in all situations.
- Large galley with fridge/freezer as well as great cruise storage
- Very large bathroom with separate shower
- 2 forward cabins with island bed forward.
- Fairway quiet hull shape which reduces that 'slap slap' noise found in most cruisers.
